

Traydon

TRAYDON GMBH · KERPEN NEAR COLOGNE, GERMANY

Industrial equipment, spare parts and components **for your operations**

Traydon supports your purchasing team in sourcing industrial equipment – from a single spare part to a list with many items. Send us the manufacturer, part number and quantity – or describe what you need with a photo, the nameplate or a drawing.

COMPANY

Sourcing industrial equipment **from a single source**

Traydon GmbH is based in Kerpen near Cologne, Germany. The company supplies industrial equipment, spare parts and components and supports businesses with procurement. The Managing Director is Dimitrij Nagel.

How we work

- 01** Requests are accepted even with incomplete information and clarified specifically.
- 02** Manufacturer and part numbers are taken over unchanged, not silently replaced.
- 03** Alternatives are only requested if you explicitly ask for them, and they are labelled as such.
- 04** Standard products can be ordered directly from two Traydon shops.

Who we support

Traydon supports technical purchasing and maintenance teams – when you need a spare part for an existing plant, technical components for a project, or several items from different product areas.

The starting point is always your specific requirement: as a part number, as a photo or drawing, or as a list of several items.

8 product categories From hydraulics and pneumatics to industrial plant	Part number, photo or drawing Send your request with the details you have	Several items In one request, including parts lists	Two online shops For spare parts and for operating supplies
---	---	---	---

RANGE

Eight product categories – from hydraulics to industrial plant

01 Hydraulics & pneumatics

Pumps, cylinders, hoses, valves and valve blocks, control units, filters, compressor spare parts

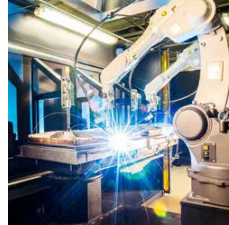

02 Electrical & electronics

Cables, switches, control panels, signalling devices, frequency inverters, relays, rotary encoders

03 Drive technology & mechanics

Ball bearings and rod ends, ball screws, spindles, couplings, seals, gearboxes, timing belts and timing belt pulleys

04 Automation

Motors and drives, linear systems, controls, sensors, laser systems, measuring devices

05 Steel products

Stainless and special steel, fittings and flanges, tubes, round, flat and profile steel, sheet metal, wire rod, castings

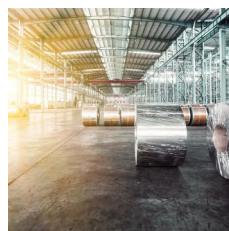

06 Special products & parts made to drawing

Parts made to drawing, carbon brushes, ceramic sleeves and drawing dies, rotors and stators, conveyor systems, plastic parts

07 Industrial plant & machinery

Machinery and plant requirements: metalworking, tube processing, marking and painting lines, cable machinery

08 Operating supplies, containers & pallets

Containers, pallets and operating supplies as goods – directly in the Traydon shop traydon-shop.de (in German)

Each category page on www.traydon.de/en/ shows which details make a request easier to process. Manufacturer names are used for identification of a part only.

HOW WE WORK

Three ways to send a request

Part number known

The manufacturer, the original part number or type code and the quantity are enough.

Photo, nameplate or drawing

If the part cannot be named unambiguously or is made to drawing.

Several items

A parts list or requirements from different product categories and manufacturers in a single request.

How it works

01

Send your requirement

Provide a part number, a photo of the nameplate, a drawing or a parts list.

02

Clarification of details and sourcing options

We review your information and get back to you if anything is unclear.

03

Response and, where applicable, a quotation

You receive a response to your request. A request is not an order.

What we take care of

- Recording and clarifying your requirement, even if the information is incomplete
- Researching sources of supply for the requested version
- Combining several items and manufacturers in a single request
- A response or quotation for each item

What we do not promise across the board

- Technical interchangeability of parts without a case-by-case review.
- Stock levels, delivery dates or prices without a specific request.
- Technical design.
- Deliveries abroad are subject to review under export control and sanctions regulations.

Installation and commissioning of the machines and systems we supply are available on request.

We do not quote general processing or delivery times. Dates are agreed for each individual request.

FIELDS OF APPLICATION

In depth for the **steel and cable industries**

Steel industry

Machinery, wear parts and parts made to drawing for steel processing.

Cable industry

Rollers, wire and thread guides and drawing dies for cable manufacturing.

For regulated applications such as food contact or explosion protection we do not promise suitability. The required documents must be available for the specific product – please state such requirements in your request.

Our **shops**

Standard products can be bought in one of the two Traydon shops. For everything else, please use the request form.

Spare parts & components

Shop for industrial spare parts and components.

traydon-spareparts.com

Operating supplies, containers & pallets

Shop for operating supplies, containers, pallets and other goods (in German).

traydon-shop.de

CHECKLIST

What belongs in a spare parts request?

- Manufacturer – or “unknown”
- Complete original part number or type code, copied unchanged
- Description of the part and its function
- Quantity and unit
- Delivery country
- Requested date, if any
- Whether an alternative is acceptable and which properties must be retained
- Photos, data sheet or drawing

Photographing a nameplate

- Photograph it straight from the front, without flash reflection.
- Show the whole plate, plus a close-up of lines that are hard to read.
- A second photo shows the part as installed.

Send your requirement

Start with the information you have. We will clarify any open points together with you.
